2013-01-03	07:56:16 AM			My levels to the downside today are: 51.50, 48, 44, 39-41. #ES_F
2013-01-03	07:57:07 AM			My levels to the upside today are: 58.25, 61.75, 67.75, 73.50. #ES_F
2013-01-03	07:57:52 AM			I have 52.75-53.75 as the Key-LVN from yesterday and 52.75 as the ONVPOC.
2013-01-03	08:00:56 AM			why do you have 51.5 as level?
2013-01-03	08:01:52 AM			5300> 5600 is yday`s "single print" area , key area to watch early imo
2013-01-03	08:05:07 AM			I have it as the top of the value area from yesterday. I'm interested to see how it reponds if/when it gets back there today. If it gets bought pretty strongly then I'll be expecting range extension to the upside. If it doesn't get respected at all, then I'll think the aggressive move up yesterday late was just a squeeze/shenanigans
2013-01-03	08:06:49 AM			Here is link to stats on GAP's that are closed during IB period. FT was interested in this. http://www.screencast.com/t/cZDwba8vkF
2013-01-03	08:07:00 AM			ok, i figured but was just checking, i have 51 as VAH, must be some data discrepancy
2013-01-03	08:07:07 AM			I did not do the fancy binning/distribution stuff.
2013-01-03	08:07:24 AM			If it doesn't get tested at all today, it isn't something that I will keep on my charts and keep watching in the future
2013-01-03	08:08:00 AM			gm folks

2013-01-03	08:08:09 AM	think its a short at open ?
2013-01-03	08:08:23 AM	gm
2013-01-03	08:08:39 AM	i think it will, ON lo looks super weak, tested 4 times
	08:08:41 AM	Probably my settings I think I used 70% rather than the 67.667 or 68%
013-01-03	08:11:04 AM	Thanks Tracy. Looks interesting.
013-01-03	08:11:32 AM	The interesting on the size of the moves when it does not close. Much larger than I thought.
013-01-03	08:12:47 AM	Good morning, Traders! \$ES_F pulled back to LVN+IBH during globex session. Holding thin part of yday's profile #FT71
013-01-03	08:13:19 AM	That is the range from pCL, right? Over 80.
013-01-03	08:14:56 AM	2.3 times the gap size is the average size of the next move if the gap is not closed.
)13-01-03	08:15:56 AM	Glad I didn't know that yesterday!
13-01-03	08:16:08 AM	Reminder: \$ES_F composite switched to 10/11/07. Pushing against highs put in back in 2007 #FT71
13-01-03	08:18:29 AM	Overnight news:
)13-01-03	08:20:14 AM	Overnight news: ADP comes in @ 215k vs. 140k expected. Europe slightly weaker this morning. Fiscal Deal signed into law #FT71 \$ES_F
)13-01-03	08:21:37 AM	Eco releases: ISM NY @ 8:45 CT, Fed Minutes @ 1 CT, Auctions at 10 CT. #FT71 \$ES_F
)13-01-03	08:22:59 AM	Nearest hi in \$ES_F is at 59.75 from 10/5/12, 61.75 is the MC high in this area. Seeing Key CLVN @ 67.75 (11 pts away) #FT71
13-01-03	08:24:38 AM	Expecting buying to slow down. Massive gap zone below @ 44.00 to 25.75. Still looking @ 44.25 for retest, 40.00, 38.25, 33.75 & 28.25 #FT71 \$ES_F
)13-01-03	08:26:29 AM	Opening in thin zone from yday afternoon. Expecting 2-way action at open. Poolow overnight #Ft71 \$ES_F
013-01-03	08:27:25 AM	Wed's vpoc is low in the profile and value did not follow later afternoon price on the rally. However, there was no attempt at all to visit the gap below. ON has auctioned across the top 'out-of-value area' of Wed's profile. The ON vpoc is very low in the profile similar to yesterday. ON inventory is short on normal range and volume.
13-01-03	08:27:30 AM	Want to remind folks not to get caught up in the rally fever. #FT71 \$ES_F
)13-01-03	08:28:20 AM	Ur goal is to trade ur probabilities & pay up a predetermined amount (ur stop) to find out if mkt is in ur favor #FT71 \$ES_F
)13-01-03	08:29:22 AM	Any other approach is probably random & is close to gambling. In poker, u ante up to see the next card. Same in trading (ur stop amt) #FT71 \$ES_F
13-01-03	08:36:37 AM	OD or OAIR?
	08:36:54 AM	Here is the key low volume area from yesterday
13-01-03	08:37:44 AM	I have OS as 53.25 to 56.75
13-01-03	08:37:53 AM	\$ES_F now at yday's key LVN #FT71
13-01-03	08:39:05 AM	big move coming
13-01-03	08:39:20 AM	OTD-ish open (test of yday's close). Not an open drive. OSH 56.75. OSL can be 55.50, 55 or 53.25 #FT71 \$ES_F
13-01-03	08:40:07 AM	\$ES_F pulling back to mid Likely to continue to ONL. Trade ur plan. #FT71
13-01-03	08:40:36 AM	Transports neutral, Financials down. Euro down.
013-01-03	08:42:36 AM	Transports positive since open. Holding this move. Financials leading charge down #FT71 \$ES_F
	08:42:53 AM	\$ES F now at yday's IBH + ONVPOC #FT71

2013-01-03	08:47:32 AM	neato!
2013-01-03	08:49:31 AM	New lows made. Retesting mid again. Buyers active based on VPOC location. Caution shorts now for short term #FT71 \$ES_F
2013-01-03	08:50:01 AM	note ES traded down to bottom of yday's "single print"-low vol area responsive(small so far) buyers there
2013-01-03	08:50:50 AM	Yep. That's what I'm seeing as well. However, those guys might fuel a push lower. Still expecting breach of ONL or at least test @ 52.25
2013-01-03	08:51:34 AM	Footprint folks: how many traded at 55.00 on the rotation?
2013-01-03	08:51:47 AM	683
2013-01-03	08:52:12 AM	Thanks, rj. That more than I thought.
013-01-03	08:53:33 AM	Using OS 56.75 to 55 now #FT71 \$ES_F
2013-01-03	08:54:22 AM	my platform isn't working. did the log in and password change? if so, can you tell me what is the new one? thank you
2013-01-03	08:54:42 AM	or sorry
013-01-03	08:54:48 AM	just tried the chat on ipad works great thanks
013-01-03	08:57:59 AM	look at the 8:46 link above
013-01-03	08:59:02 AM	NQ near HOD
013-01-03	09:00:35 AM	NQ double/triple top
013-01-03	09:03:21 AM	Very weak low in NQ; 344 contracts traded at low tick
013-01-03	09:03:28 AM	A lot of compression in this profile. Building energy. Suggest we don't get stubborn. #FT71 \$ES_F
013-01-03	09:05:05 AM	Transports maintaining 0.27% gain since open. \$NQ_F follows. \$DAX_F and \$6E_F now positive since US Open #FT71 \$ES_F
2013-01-03	09:07:44 AM	Only 4 pts of range in \$ES_F so far. 177k in volume. Again, don't get stubborn #FT71 \$ES_F
013-01-03	09:09:53 AM	Market rumor: Hugo Chavez might have passed away #FT71
013-01-03	09:10:09 AM	Happy New Year!

I guess he nationalized the oil industry. That might cause crude to rise due to uncertainty of supply/potential civil war I would expect higher. A chance for more open economy, US oil companies can get in there, etc. Re this morning's spreadsheet: Was there a reason not to list gap closes that occured outside the IB?

	09:15:02 AM	(Off topic) Is there a way to configure the S5Trader Demo not to "fill on touch"?
	09:18:05 AM	It doesn't actually it tries to simulate where you are in the order flow. But just in case, personally, after having this discussion here, I've taken to keeping my journal notes and data based on whether the action goes one tick beyond the price. That way you get a better, more certain, read on how your plan is working.
	09:19:00 AM	To state it another way, this business is much more interesting when *other traders are uncertain. ;)
	09:19:30 AM	DBL top at IBH now. 54.75 mid needs to hold for continuation in that direction. \$ES_F at OSL now #FT71
	09:19:32 AM	Yeah, thats what Im currently doing, mark it as "fake fill", oh well, thought I was missing some setting.
2013-01-03	09:22:19 AM	Best way to get a realistic fill is to put your order in when the price is within the market depth. Does that make sense? This way, it can see where u r in the queue. Otherwise, it has no choice but to fill u first since other limit orders in queue are not known.
2013-01-03	09:22:48 AM	Nowif u r selling at limit at a price where another OEC customer has a 100 lot sitting there, then u will be the 101st to get filled even if it is outside the market depth range.
2013-01-03	09:22:52 AM	I hope that makes sense
	09:23:16 AM	Even though it fills quickly, it is by far the best sim I have seen so far. Almost a others fill on touch no matter what.
2013-01-03	09:24:26 AM	So when price is ~5 levels from my zone I should put my order, then I would be simqueued at the end?
2013-01-03	09:24:31 AM	when i use it, I put it in 1 tick higher than I intended that way if you get filled, you definately would have gotten filled with a real trade
2013-01-03	09:25:57 AM	Correct
2013-01-03	09:26:13 AM	That is still a best guess scenario
2013-01-03	09:26:46 AM	OK thx. Its ok, most of the time it finally do goes thru my fill, maybe only 2 times I got the high/low swing
	09:27:13 AM	for some reasonthis does not look right
2013-01-03	09:27:19 AM	volume to pathetic
	09:28:56 AM	Blunt little profile. Tough sledding here.
	09:30:11 AM	Below normal IB range and volume.
	09:35:33 AM	stopped 2 ticks from ONL, now 2 ticks for ONH, is it a message from the God of stats?? ^o)
	09:37:11 AM	Wellthose stats are looking at the whole session :)
	09:37:59 AM	I have marked a 10/5 lvn above vpoc at 58.75. Is that a valid reference?
	09:38:25 AM	Eventually we would get a tag of either onh/onl at 16:14:59 est, hehe.
	09:39:08 AM	Financials now pushing lows #FT71 \$ES_F
	09:40:25 AM	I see it on the MC. Yes, that is a neckline but it is minor. I wouldn't fade it.
	09:41:23 AM	It's not exactly what I'd call a deep Ivn. Still trying to get a feel for judging those on da profiles. Thanks.
	09:43:08 AM	I don't know how long weak hi's and low's are relevant, but I noted that 10/5 has a weak hi and DBL top at IBH.
	09:43:17 AM	Feels like mkt is trading at 1/2 speed. Might be waiting for Fed Minutes #FT71 \$ES_F
	09:43:35 AM	r u guys long?
2013-01-03	09:43:47 AM	(That 10/5 hi is 59.75.)
· · · · · · · · · · · · · · · · · · ·		Page 4

		· · ·
2013-01-03	09:43:49 AM	Do you carry those forward on your charts?
2013-01-03	09:44:00 AM	weak hi/lo's?
2013-01-03	09:44:03 AM	Nice job. I have that as well. Dbl top is small though.
	09:44:48 AM	NQ 3?s: opened near YD's close, filled gap and drove lower to scene-of-crime of YD's EOD rally, then drove higher to test major CLVN at 2746, we've pulled back to MID, VPOC & opening print, mascerating the OS now13 pt IB is small, volume is 20% below average
	09:45:07 AM	Yes, I noticed that. So are these weak hi's and low's relevant after such a long time?
2013-01-03	09:46:08 AM	Wouldn't that weak Hi or Low depend on what it was testing. New level or old, etc. Just wondering.
2013-01-03	09:46:10 AM	I don't have it marked on the chart, but wrote it in my notes this morning. As you can see, I'm asking Morad if they really are relevant.
2013-01-03	09:46:13 AM	Some of us had a question yesterday about a stat u provided awhile back. The notes I have read:1% or more gap days in ES - 263 of 1439 = 18.3% Of those gap days, the following day had an 80% - 100% range as that of the prior days range Meaning, if there is a gap of 1% or more in ES, it is normal to expect almost the gap range the following day.
2013-01-03	09:46:20 AM	We'll see when we get there
2013-01-03	09:46:40 AM	Great non-answer!
013-01-03	09:46:41 AM	All we know is that prices were not swiftly rejected
013-01-03	09:47:28 AM	Not for me. I'm always up by the crack of noon.
2013-01-03	09:47:34 AM	So would the gap range (which was 23.75 yesterday) be the factor in this thesis or would we calc it on the RTH range?
013-01-03	09:47:36 AM	I remember around 80% of prior day's range, yes
013-01-03	09:47:36 AM	That was my thinking, and therefore not a good fade (for the faders out there).
013-01-03	09:48:12 AM	I simply looked at 1) how big is gap, 2) what range is today 3) what range is nex day vs today. All RTH
2013-01-03	09:49:22 AM	so yesterday's rth range was 14 ptsso the thesis would be calc on 80%-100% of 14. thx
2013-01-03	09:49:27 AM	Showing transports 0.42% above opening price, Financials -0.36% of opening price. Rest of mkts at or around opening #FT71 \$ES_F
	09:49:49 AM	Correct
	09:50:04 AM	Remember, it is just an educated guess based on an existing data set
	09:50:33 AM	but better than gambling.
	09:50:39 AM	So today can be around 11 to 14 pts in range
	09:50:58 AM	needs 2 take out 53s?if this has to run lower?
013-01-03	09:51:08 AM	Really liking this chat app. No need to find a computer to log in and see what is going on.
2013-01-03	09:52:26 AM	There's another study I ran a few weeks ago where I found the most common ratio of the day range to the ib range was ~ 1.9 to 2.0
013-01-03	09:52:51 AM	Interesting to note: Most traded price range on SPX since 6/4/12 is 1412. 2nd most traded is 1433 & 3rd is 1460 (where we r now) #FT71 \$ES_F
2013-01-03	09:53:17 AM	Mkt has paused and churned at each of those nodes on daily as expected #FT71 \$ES_F
2013-01-03	09:53:18 AM	I got roughly the same for NQ ~1.89
013-01-03	09:53:46 AM	Hence 2x IB on my charts:)

2012 01 02		
2013-01-03	09:53:46 AM	Is there a remaining offset due to premium?
2013-01-03	09:54:26 AM	Those are the good ones to put in those bands on side of chart use less room.
2013-01-03	09:55:07 AM	I've been doing it manually. Was there a tutorial/webinar on how to impliment those?
013-01-03	09:55:12 AM	Winding up tight here.
2013-01-03	09:55:16 AM	Something I wanted to check yday, checked it today: IF IBH>ONH then IBH breached 72% of the time.
013-01-03	09:55:38 AM	Might still have the screenshots let me look.
2013-01-03	09:56:48 AM	!! BUT !! IF IBL breaks befores the IBH then the IBH break drop to ~30%, so it wasn't that helpful yday :D
013-01-03	09:57:09 AM	any short opportunity here?
013-01-03	09:57:19 AM	hey thx I like itgoing to work that one in to the mix:D
013-01-03	09:57:28 AM	Here is the setting for the IB in band. Just make 2 more Custom Indicators (CI) for the double and put in another band value.
013-01-03	09:57:58 AM	What do you have for ONH? 1458?
013-01-03	09:58:18 AM	Check if you have a custom Indicator for IB_DIBH (it's from FT's charts)
013-01-03	09:58:21 AM	Yes, 1458.

2013-01-03 10:55:44 AM		Yes, it is in or likely at 61.75. I just wanted to make sure because in my notes thiis a.m. I referenced that and yet it seemed many were looking for weakness despite the stat
2013-01-03 10:56:53 AM		My expectation was to test lower toward yesterday's value. It might still happen and doesn't necessarily conflict with the higher-high study.

2013-01-03 11:23:58 AM	V V ii r	did not, but 80% rule played out well for those who follow it. Scenario 1 When the market opens above the value area and is able to hold the value area high on subsequent tests, it is a strong bullish signal. If the market begins to trade within the
		value area and volume picks up it would be recommended to exit long
2013-01-03 11:25:35 AM	it	it was a good rotation into it but given that the ONLO was just below and so weak, i passed too

2013-01-03 11:27:53	AM	yes, good rotation & onl sitting there. also, get a little uncomfortabel when rth can't trade above vwap. when we've seen rotations above and below rth vwap,i feel more confident we'll have a rotational day. but when it is steady selling with nominal lifts, i get more cautious. trend days have been killer for me, so i try to be aware of /es pattern early on

2013-01-03 12:07:59		Thanks for your feedback. I figured there is no "wrong" microcomposite but I read on Benko's blog that ideally a MC or composite is a single swing unless you desire more resolution so that is why I was asking. If you have (or draw it now) that MC do you think the 60.50 LVN is actionable (assuming other confluence)?
2013-01-03 12:09:02		I believe 60.50 is a composite lvn mentioned by FT this morning.
2013-01-03 12:09:23	PM	I do think it is a valid LVN

	12:50:00 PM	yes, hi probability it will be broken per benko: Based on the last 1000 RTH sessions, when we make a HH between 1:00 - 2:00 est, we have a 76% probability of taking out the HH during the rest of the session. When we make a LL between 1:00 - 2:00, we have a 71% probability of taking out this LL during the rest of the session. When we rplace the condition "taking out" with "testing within 1 point or better", the stat changes to 92% for HH and 86% for LL.

2013-01-03 01:34:12 PM	perhaps the fed thinks they are pushing on a string at this point and the economy must stand on its own. there is still a ton of excess resrves on bank balances sheets and lending spree is certainly bullish and inflationaryhowever, there has only been a small incremental advance of economic activitywhat is more important at this point IMO is fiscal certainty, which hasnt been addressed as of latewe got problems

2013-01-03 02:28:13 PM	One that hasn't been cleanly rejected - ie found buyers at the low or sellers at the high. The auction lingers on the hi or low long enough to accumulate a bit of volume. It's easy enough to see if you use volume profile charts.
2013-01-03 02:29:28 PM	The idea is because those prices at the edges aren't considered unfair, there's an increased likelihood of further extension.

2013-01-03 02:34:46 PM	48.00 - bring it. But hurry or Tracy won't let me trade it. >(
2013-01-03 02:34:57 PM	just broke val area i supposecharts not in front
2013-01-03 02:36:08 PM	The fade today looks a lot better than Yday. A least it is working hard here.
2013-01-03 02:37:41 PM	yday's ValH was 51.75
2013-01-03 02:38:49 PM	See if you get your 48 now. The clock is now the enemy.
2013-01-03 02:41:51 PM	todays VAIL 52.50 ?
2013-01-03 02:42:40 PM	today's VaIL = 53.25
2013-01-03 02:43:41 PM	kwill check again since i use TSwill chk why the discrepancythnx
2013-01-03 02:44:20 PM	could 2morrow be trend down?if tight range today
2013-01-03 02:45:16 PM	good to see price moving higher
2013-01-03 02:48:44 PM	whoohoooFT's stat of 80 - 100% of previous day range came to passwe had a 10.50 pt range today and yesterday's range was 14 pts
2013-01-03 02:48:53 PM	is there a pause in price?
2013-01-03 02:53:52 PM	guyswhere is price?
2013-01-03 02:54:03 PM	50.75
2013-01-03 02:54:27 PM	was there a pause?or jsut my pc froze?
2013-01-03 02:54:35 PM	no pause
2013-01-03 02:54:39 PM	hmm ok thnx
2013-01-03 02:55:21 PM	Targeting 49.25. Risk off. Glad to be out of the hot kitchen.
2013-01-03 02:55:56 PM	as long we dont break the val li think we may have a good posgetting into ovn n tomorrow
2013-01-03 02:57:06 PM	today's valLow now = 50.75
2013-01-03 02:58:45 PM	Eh? I'm good. Nothing to do but wait.
2013-01-03 02:58:54 PM	lolthey selling intoso lets see where this closeschk Cuml Tickn volume
2013-01-03 02:59:58 PM	Closed the remainder at IBL.

2013-01-03 03:01:14 PM	Hi guys1st day of using S5trader in greenany ideawhy i did not get a messagosaying no working ordersn stuff like that while exiting ?any help
2013-01-03 03:02:39 PM	If cancel buttons are greyed out you are clear to shut down.
2013-01-03 03:03:24 PM	It's to make sure you don't exit with orders still working on accident
2013-01-03 03:05:55 PM	but how can i turn it onit's a feel good feeling to get a popup
2013-01-03 03:06:29 PM	now that the excitement is dying downanyone try the iOS 123FlashChat app? min seems to only permit numeric entry: http://www.screencast.com/t/xbQQXmbBybC i wonder if I DL'd a different app somehow
2013-01-03 03:07:12 PM	Use 678
2013-01-03 03:07:20 PM	I downloaded the app onto my ipadbut couldnt get it to do anything.
2013-01-03 03:08:07 PM	did i miss that instruction?
013-01-03 03:08:15 PM	That's the mobile chat ID
013-01-03 03:08:20 PM	all I get is a blank white frame
013-01-03 03:08:21 PM	for this room
013-01-03 03:08:40 PM	That happened to me to on the ipad. Kill the app and restart it.
013-01-03 03:09:02 PM	Do you know how to do that?
013-01-03 03:09:52 PM	no do you mean delete it and install again?
013-01-03 03:09:56 PM	I'm in. thx!
013-01-03 03:10:11 PM	Close the app with the home button. Then dbl-press the home button. When you see the app in the icon bar below, press the X to kill the process.
013-01-03 03:10:40 PM	Then home once again to close that icon bar.
013-01-03 03:10:45 PM	Ok good.
013-01-03 03:13:57 PM	Man, I had a hard time getting fills today, having failed to frontrun my entries. Sharor was clubbing me stoutly about the snout and forearms with that newspaper yesterda and I should have listened to her.
013-01-03 03:15:33 PM	well at least you know you chose a good entry level as tons of other traders and probably the algos made the same choicebut the algos front run I am convinced to keep you out.
013-01-03 03:17:22 PM	I had hoped our reference levels were more private.
013-01-03 03:19:27 PM	I did but didnt hold long enough. wish I could say I went short at the top and held to the bottom.
013-01-03 03:19:53 PM	I did buy some puts at the top that I am still holding.
13-01-03 03:20:25 PM	Are you trading ES options?
13-01-03 03:20:31 PM	spy
13-01-03 03:20:57 PM	good night. thanks
13-01-03 03:20:58 PM	more liquidity in spy than es futures options
13-01-03 03:22:15 PM	10 spy option cts equal one es future so that allows for scales
13-01-03 03:22:59 PM	But with options, you have to know how to do M, m, mm, mmm, Math.
13-01-03 03:24:29 PM	it is easier math than excel really just need to learn how to understand volatility. the other math like probability of itm, roc, etc is provided in the option chain page
13-01-03 03:25:17 PM	I suppose gamma really isn't all that difficult if you can do, for instance, transforms of the Fuchsian Model. :/

2013-01-03	03:28:09 PM	I would like to do options on futuresbut somehow they seem more scary than on equities but they have one advantage that we can trade them whenever futures are trading.
2013-01-03	03:28:28 PM	There is such a thing. I've asked a couple of engineering/math wizards what it means and they think it's pretty inscrutable. http://en.wikipedia.org/wiki/Fuchsian_model
2013-01-03	03:29:13 PM	You want More leverage?
2013-01-03	03:30:29 PM	Hey guys, I don't mean to inturrupt but, what do you have as yesterday's closing price on the ES?
2013-01-03	03:33:00 PM	Do you mean at 4:15 ET? 1444.00
2013-01-03	03:34:18 PM	Well I suppose that's what I'm trying to figure out?
	03:34:54 PM	Last I heard we were waiting for a workaround on the new times for IRT charts
	03:35:22 PM	Same here. Until I figure out how it impacts studies, etc. I'm using the old CME times.
2013-01-03	03:36:24 PM	I was looking at the chat from this AM and FT said the open was tested and I don't see it at the mo
	03:38:05 PM	sry YCL tested not open
	03:41:05 PM	yest close was 56.5 at 4:15pm and 57.5 at 3pm cash close. 57.5 was tested about 9:40am cst this morning
	03:42:48 PM	I'm just seeing that. I had to look at the 24 hr chart. Thnx
	03:43:01 PM	actually tested at high of 9:30am 5 min candle so it was test as it turned back down after trading 57.5
2013-01-03	03:45:03 PM	I use a 2500V chart of FT's, which showed an openof 56.50, but my close was @ 57.25. What's a couple of ticks between friends?
2013-01-03	03:46:41 PM	I have 56.75 for the close of the last 2500v candle.
2013-01-03	03:47:06 PM	57.25 was its high
2013-01-03	03:47:42 PM	So to me the open looked like an OD, but if you wait for the test of ONVPOC you could call it a OTD?
	03:48:25 PM	57.25 was what's high?
	03:48:49 PM	The last candle yesterday
	03:48:54 PM	2500v candle
	03:49:14 PM	Oh yeah, agreed
	03:51:14 PM	Starting a new Micro-Composite profile (MC) to include yday and today in \$ES_F #FT71
2013-01-03	03:59:28 PM	FT. In this AM's chat you said "Yep. That's what I'm seeing as well. However, those guys might fuel a push lower. Still expecting breach of ONL or at least test @ 52.25". When did you change yourmind and go long? What did you see that changed your mind?
2013-01-03	04:03:42 PM	When it breached midpoint and especially when it put in a dbl top at IBH
	04:04:12 PM	is there any good logic between tpo & vol profile for ex:- time spent lower prices / low vol & hence PA Upor time spent Higher prices / low vol & hence PA down.
	04:05:13 PM	So at that point you're looking for higher highs, and getting in on a test of the MID?
2013-01-03	04:05:32 PM	Yes, i posted that setup before it happened here and on twitter as well
	04:06:22 PM	I haven't got to that point in my review of the chat. Ooops
